Internship

Python Programming Intern | Python, Google Gemini API

Jan 2025 - Mar 2025

YBI Foundation

- Completed a structured and intensive internship focusing on Python programming, RESTful APIs, and backend development, delivering all three project milestones ahead of schedule.
- Delivered a full-stack AI-based resume screening system as part of a backend-focused internship, integrating REST APIs, LLM processing, and frontend workflows.

Projects

AOSP Development | Android (AOSP), Linux, Git

Dec 2025 – Jun 2026

- Built and customized AOSP ROMs, working with system-level components, build systems, and device configurations.
- Modified the device tree to enable in-display fingerprint (FOD), 5G, and double-tap-to-wake (DT2W) support, integrating hardware-specific kernel and vendor changes.
- Debugged kernel and HAL-level driver issues across multiple builds, resolving boot failures and stability regressions to ensure reliable device performance.

Variance (AI Text Paraphraser) | React, TypeScript, WebGPU, Transformers.js

Jan 2026 – Feb 2026

- Engineered a client-side text transformation pipeline with tiered execution (algorithmic + local LLM) to reduce AI detectability.
- Implemented WebGPU-based local inference and semantic validation for high-performance, privacy-preserving text rewriting.
- Optimized in-browser model inference for latency and memory footprint, enabling real-time rewriting entirely on-device with zero server-side data transmission.

Resumify | Django, React.js, Python, Google Gemini API

Jan 2025 – Feb 2025

- Developed an AI-powered resume evaluation system using PDF parsing and LLMs to generate structured scoring and actionable feedback.
- Automated ATS alignment analysis, extracting strengths and weaknesses to standardize candidate assessment.
- Designed a Django REST backend integrated with the React frontend to deliver real-time resume feedback and scoring reports.
- Repository link: github.com/justsarx/Resumify

Achievements

- Custom AOSP ROM Development — Moto Edge 40 Neo** Dec 2025
Ported and maintained custom Android ROM builds for the Moto Edge 40 Neo, recognized as the earliest release of Android 16 for the device, showcasing deep AOSP and low-level system expertise.

Skills

Languages: C++, Python, Core Java, SQL

Technologies/Frameworks: Django, React.js, Node.js, REST APIs, Docker, Git, GitHub

Databases: MySQL, Oracle Database

Domain Skills: Linux, Android Open-Source Project (AOSP), Object-Oriented Programming, Data Structures and Algorithms

Soft Skills: Problem Solving, Communication, Adaptability, Teamwork

Education

Lovely Professional University

2025 – Present

Master of Computer Applications – CGPA: 8.55

Jalandhar, Punjab

Lalit Narayan Mishra Institute of Economic Development and Social Change

2022 – 2025

Bachelor of Computer Applications — CGPA: 7.75

Patna, Bihar

Shivam School

2021 – 2022

12th with Science — Percentage: 63.8%

Patna, Bihar

Dr. G.L. Dutta D.A.V. Public School

2019 – 2020

10th — Percentage: 61.17%

Patna, Bihar
